

**Function** Software Engineer

**Degree** Bachelor or master in IT

**Level of degree** University

**Parttime/fulltime** Full Time hybrid flexible working model

**About Innovatiespotter** We are the market leader in the Netherlands in data-driven research and consultancy in the economic domain. De Innovatiespotter is the data platform for innovation professionals and innovation policy. We work for renowned organizations, such as the Ministry of Economic affairs and Climate, TNO, CBS and RVO. Our data contributes to a strong innovation-ecosystem.

Our team is made up of talented and self-driven individuals who are passionate about technology and delivering exceptional results to our clients.

**Job description** We are currently seeking a highly skilled software engineer to join our team. As a software engineer, you will be responsible for designing, developing, and maintaining high-quality software solutions that meet our clients' needs. You will work independently on projects, while also collaborating with our engineers to ensure the timely delivery of projects. You will be expected to:

- Design, develop, and maintain software solutions that meet client requirements
- Write clean, efficient, and well-documented code
- Work independently on projects, taking ownership of the development process from start to finish
- Investigate and troubleshoot software issues
- Stay up-to-date with emerging trends and technologies in software engineering

If you have strong problem-solving and communication skills with a passion for software engineering, we encourage you to apply for this exciting opportunity. Apply today and become a part of our dynamic team.

- Qualifications**
- Bachelor's degree in Computer Science or related field
  - At least 1 years of experience in a company with software engineering
  - Strong knowledge of one or more programming languages such as PHP, Python, or similar
  - Experience with software development tools such as Git, JIRA, and Agile methodologies

- Ability to work independently and as part of a team
- Experience with Databases preferably with postgresSQL
- Ability to adhere to the Research and Development (R&D) process while prioritizing simplicity, performance, and complexity considerations.

***The company*** Innovatiespotter is an international, interdisciplinary and ambitious team. We are flexible and don't have a 9-5 mentality. There is a lot of opportunity to work with other disciplines.

***Location*** Groningen with option hybrid or fully online

***Duration*** Flexible

***Hours*** 24-40 hours

***Salary*** Flexible, depends on professional experience and background

***Starting date*** Flexible

***Contact info*** We hope to see your CV with motivation via: [t.van.der.sluis@innovatiespotter.nl](mailto:t.van.der.sluis@innovatiespotter.nl)
